Q14 - What, if anything, did you find most valuable about this course?
Response Rate: 80.00% (**4** of **5**)

1	The presentations were extremely useful, particularly Bob's feedback. It really improved my understanding of the material.
2	The emipirical methods and notes are super useful, especially when you wanna develop some knowledege of this field.
3	I found the range of topics covered the most valuable part. I had no prior experience with labor economics, so being able to see all the areas it can cover was super valuable.
4	Bob offers a very good guide on presenting a paper

Q15 - In what ways, if any, could the course be improved?
Response Rate: 80.00% (**4** of **5**)

1	The arrange of the time could be improved a little
2	Small thing - Sometimes multiple paper's were presented in a class, and the authors or name of paper weren't written or put with the model, so it would be hard to follow exactly which components of the model were for which people. The actual material was presented great, but when we would go back and reference names in future classes, sometimes I wouldn't have the name with the model.
3	It will be better if the classnotes would have some pdf for reference.
4	I think the course should have replications, homeworks, or data excercises like IO. Sometimes with a topic like discrete choice dynamic programming, it's hard to understand without working with data.
